

Masoneilan* Model 4411 Electro-pneumatic Transducer

fact sheet

Modularity for ease of maintenance

General Description

The Masoneilan 4411 proportional I/P converter from GE Oil & Gas is a precision electronic pressure controller designed for continuous process control applications. The instrument operates a closed loop system incorporating a feedback sensor, providing long-term stability and high accuracy performance along with "fail-safe" operation, in which the output falls to a low pressure upon loop current failure. Its modularity provides additional ease of maintenance.

The 4411 instrument combines substantial flow capacity with the ability to give precise control into closed volume "dead-end" applications. The instrument was designed to withstand the rigors of industrial environments such as shock, vibration and positional effects. It is available as explosion proof, intrinsically safe and non-incendive. Its vibration immunity and IP66 weatherproof rating make it ideal for field applications.

Model 4411 Electro-pneumatic Transducer

Technical Data

Pneumatic	
Output Signal:	3-15 psig (0.2-1 barg) or 6-30 psig (0.4-2.1 barg)
Air Supply:	Oil free, dry air, filtered to 50 microns; Internal built-in air filter
Flow Capacity:	> 300 NI/min (12scfm)
Air Consumption:	< 2.5 NI/min (0.1scfm) typical
Response Time:	≤ 1second (from 10 to 90 percent or 90 to 10 percent of output pressure into a 500cc load)
Total Error:	≤ 0.1 percent of span for > 500cc load, < 0.15 percent of span for < 10cc load (typical, independent error includes the combined effect of non-linearity, hysteresis, deadzone and repeatability)
Temperature Effect:	Typically less than 0.035 percent of span/degC between -40°C to +85°C (-40°F to +185°F)
Supply Sensitivity:	Less than 0.1 percent of span over full supply pressure range
Leak Sensitivity:	≤ 0.875 percent of span for up to 3.0scfm downstream leakage
Connections:	1/4" NPT female standard (plus integral 1/8" NPT gauge ports, 1/8" NPT exhaust baffle)
Physical	
Operating Temperature:	-40°C to +85°C (-40°F to +185°F)
Weatherproofing:	IP66, NEMA Type 4X
Vibration:	Output pressure changes less than 4 percent for vibration amplitude 4mm 5-15Hz, 2g 15-150Hz, 1g 150-1000Hz
Electromagnetic:	Compliant with EC requirements Compatibility with EN50081-2:1994 (Emission) and EN50082- 2:1995 / EN61000-6-2 (Immunity)
Material of Construction:	Aluminum and zinc die-casting with nitrile diaphragms, grey epoxy powder coating standard
Mass:	2.07Kg (4.6lbs)
Maintenance:	Modular Electronics and built-in filter offered as field replaceable parts
Mounting Position:	Integral bracket allows for surface or 50mm pipe mounting in any orientation
Electrical	
Electrical Signal:	4-20mA (two wire) Terminal voltage < 6.5V
Failure Mode:	Signal falls to below 15mbar (0.2psig) in < 2sec, when input signal fails
Insulation Resistance:	> 100MOhm at 850Vdc, electrical terminals to case
Connections:	1/2" NPT or M20 via adapter; internal terminal block with capacity up to 2.5mm ² cable

Ordering Information

Approval Certifications

ATEX approved version (94/9/EC Directive)

Explosion Proof/ Flame Proof:

II 2G
II 2D (95°C)
EEx d IIC T4 (Tamb.= -20°C to +40°C)
EEx d IIB+H2 T5 (Tamb.= -20°C to +80°C)
EEx d IIB+H2 T6 (Tamb.= -20°C to +65°C)
Umax= 30Vdc

Intrinsically Safe:

II 1G
II 1D (95°C)
EEx ia IIC T4 (Tamb.= -40°C to +85°C)
Ui= 30Vdc, li= 110mA, Pi= 0.84W
Ci= 6nF, Li= 100µH

Type nL/ Non-Incendive:

II 3G
II 3D (95°C)
EEx nL IIC T5 (Tamb.= -40°C to +85°C)
li= 24mA, Ci= 6nF, Li= 100µH

Factory Mutual approved version

Explosion Proof/ Flame Proof:

Class I, Division 1, Group B, C and D
Temperature Code T6 @ 75°C
T5 @ 85°C

Intrinsically Safe: Class I, II, III, Division 1, Group A, B, C, D, E, F and G

Temperature Code T4 @ 85°C
Vmax= 30V, Imax= 110mA, Ci= 0.006µF, li= 100µH

Type nL/ Non-Incendive:

Class I, Division 2, Group A, B, C and D
Temperature Code T6 @ 75°C
T5 @ 85°C

Dust Ingress Protection:

Class II, III, Division 1, Group E, F and G
Temperature Code T6 @ 75°C
T5 @ 85°C

Suitable for:

Class II, III, Division 2, Group F and G
Temperature Code T6 @ 75°C
T5 @ 85°C

CSA (Canadian Standards Association) approved version

Explosion Proof/ Flame Proof:

Class I, Group B, C and D
Class II, Group E, F and G
Class III
Ex d IIC, T4
Ex d IIB+H2, T5/ T6

Intrinsically Safe:

Class I, Group A, B, C and D
Class II, Group E, F and G
Class III
Ex ia IIC, T4
Vmax= 30V, Imax= 100mA, Pmax= 0.75W, Ci= 10.5nF,
Li= 100µH (30Vmax, 300ohms)

Type nL/ Non-Incendive:

Class I, Division 2, Group A, B, C and D
Ex nL IIC, T5
Class II, Division 2, Group E, F and G
Class III
