Quality Aftermarket Support

Experience and Innovation

GE Energy has combined years of quality aftermarket support experience with advanced distribution systems to create the innovative Americas Aftermarket Center for our Consolidated and Masoneilan product portfolio. Offering a new concept in rapid aftermarket part and valve provisioning, the Americas Aftermarket Center is focused on providing the fastest possible equipment delivery -- helping keep your plant running smoothly while helping to reduce costs.

The Americas Aftermarket Center addresses the all-too-common issue of devastating delays caused when aftermarket orders are processed alongside new orders. Our unique approach to aftermarket delivery means that your order receives the attention and focus needed to boost your uptime.

Responsive Professionals

Located in Houston, Texas, the Americas Aftermarket Center is staffed with extensively trained professionals focused on rapid response. Our team comprises dedicated customer support and planning resources, offering prompt access to extensive expertise and best practices. Decades of knowledge help deliver the right solutions for even the most demanding applications under critical circumstances.

In addition, our dedicated machining and shipping resources help ensure that your order is processed and delivered efficiently and quickly. And when it comes to legacy valves and parts, our team is equipped with the tools and experience to promptly handle your order.

Broad Inventory Network

Quick Access to High-quality OEM Parts and Valves

Working closely with our certified GTC* and MARC* channel companies, GE has made a significant investment in the Americas Aftermarket Center. To help ensure that we have the right part or valve when you need it, we routinely carry extensive OEM inventory on the shelf.

Our broad and deep inventory network offers the resources you need to help keep your plant operating. What's more, all of our parts and valves offer the quality and longevity that you have come to expect from GE Energy's Consolidated and Masoneilan product portfolio.

GE's MARC and GTC Network consists of more than 155 facilities located in more than 30 countries worldwide

Tackling Your Problem

Rapid Responsive Machining

At GE, we understand that your needs are unique to each situation, and standard parts and valves won't fit every scenario. That's why we are equipped with advanced machinery and technology to quickly fulfill special orders, such as an alloy trim part for a control valve or a high temperature

alloy disc for a critical safety relief valve. Our dedicated team of skilled machinists offers around-the-clock advanced machinery capability, helping to convert your part and valve request from an urgent need to a problem solved.

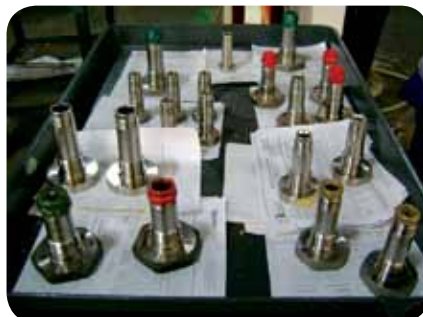

Extensive Valve Support

Aftermarket Value Services

In addition to parts, valves and machining, the Americas Aftermarket Center offers extensive, dependable support. With a team of dedicated service engineers on staff and access to a network of certified GTC and MARC channel companies, GE provides a complete array of Consolidated and Masoneilan valve support and asset management services. We can help you plan, manage, and implement plant turn-around projects, conduct surveys, and manage crucial maintenance programs.

We provide expert management and maintenance services using advanced software and tools, such as the ValvKeep* tool. We also have the knowledge and resources to conduct valve diagnostics or testing with Valscope* Pro and EVT* Pro tools. In addition, the Smart Valve Upgrade program allows our technicians to effectively upgrade plant positioners.
