

FLX360

FLX360 is a next generation, multi-function, hydraulic quick-connection system

Up to
18
hydraulic connections

Makes a connection in around 90 seconds, as opposed to the standard 8 minutes

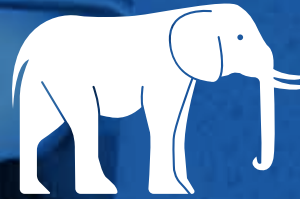

Manufactured for reliability - without welding

Safe make-ups, even when misaligned to 15 degrees in any direction and rotation

Launched in
2013

Has a pulling force of 32 tons - the same weight as around 4 African elephants

Leaves just

moving part subsea

Connects up to
200km
of tubing across a large subsea field

Designed for
4,000m
water depth,
15,000psi
hydraulics
and
40 years
of use

NEXT GENERATION

HYDRAULIC CONNECTION SYSTEM
- for a step change in reliability

ZERO
screw threads in
the connection
mechanism
