

SemStar5

The SemStar5™ is a fifth-generation subsea electronics module, for production control system applications

 **5th**
generation product -
backwards compatible

 Incorporates
25+ years'
design heritage
and subsea
expertise

~20 
PEOPLE

involved in creation of
technology :

ELECTRICAL ENGINEERS
SOFTWARE ENGINEERS
MANUFACTURING ENGINEERS

Optical communications
at the **speed of light**

Installed base covering **6** main regions

UK North Sea - Norwegian North Sea - Gulf of
Mexico - Indonesia - Africa - Australia

Winner of the 2009
**OTC Spotlight on New
Technology** award - for
technological innovation

Can withstand
temperatures
up to 135°C

**MORE
THAN
435**

orders
globally since
technology
launched in
2010

**The heart of a subsea
production system -
driving reliability and
sustainability**
